

369. Plus One Linked List Premium

Medium Topics Companies

Given a non-negative integer represented as a linked list of digits, *plus one to the integer*.
The digits are stored such that the most significant digit is at the head of the list.

Example 1:

Input: head = [1,2,3]
Output: [1,2,4]

Example 2:

Input: head = [0]
Output: [1]

Constraints:

- The number of nodes in the linked list is in the range [1, 100].
- $0 \leq \text{Node.val} \leq 9$
- The number represented by the linked list does not contain leading zeros except for the zero itself.
